

ShikhaSetu - Product Requirement Document (PRD)

Version: 1.0

Prepared On: 13 February 2026

Prepared By: Aditya Upadhyay

1. Executive Summary

ShikhaSetu is a multi-tenant SaaS platform designed to digitally transform offline coaching institutes (8th–12th, including JEE/NEET for 11th–12th). The platform provides structured content hosting, mock test infrastructure, analytics dashboards, and AI-driven performance intelligence. The core differentiation lies in building an AI-powered evaluation and concept diagnostic engine that acts as an intelligent academic performance system rather than just a content platform.

2. Vision & Mission

Vision: To build India's most intelligent academic performance platform that bridges effort and mastery. **Mission:-** Digitize offline coaching institutes.- Provide structured test infrastructure and analytics.- Deliver concept-level performance diagnostics.- Build AI-powered evaluation for academic mastery.

3. Target Users

Primary Customer (Phase 1):- Offline coaching institutes (B2B model) **End Users:-** Students (8th–12th, English medium initially)- Teachers- Coaching administrators **Future Scope:-** Direct B2C student onboarding- Government partnerships

4. Multi-Tenant Architecture Overview

Each coaching receives a dedicated subdomain (e.g., xyz.shikhasetu.com).- Strict tenant-level data isolation.- No cross-tenant data visibility.- Centralized ShikhaSetu core engine managing authentication, analytics, AI, and billing.

5. Core Product Modules

5.1 Tenant Management- Coaching onboarding- Subscription management- Student limits- Subdomain provisioning **5.2 Content Management System (CMS)-** ShikhaSetu default content- Coaching-specific content upload- Publish workflow & approval system- Question tagging (subject, chapter, topic, difficulty, exam type) **5.3 Test Engine** **Objective:-** MCQs- Section-wise tests- Timed mock tests **Subjective (Phase 1):-** Answer upload (text/PDF/image)- Manual evaluation by teacher- Rubric-based scoring **5.4 Analytics Engine-** Accuracy tracking- Speed metrics- Rank calculation- Performance comparison- Weak topic detection- Concept gap identification **5.5 Dashboards** **Student Dashboard:-** Performance summary- Weak topic insights- Rank trends- Improvement heatmaps **Teacher Dashboard:-** Batch analytics- Weak topic clustering- Manual evaluation tools **Admin Dashboard:-** Tenant performance- Subscription monitoring- System analytics

6. AI Roadmap

Year 1:- Weak topic detection- Rank prediction- Concept gap clustering- Question difficulty calibration- LLM-assisted subjective evaluation (beta) **Year 2:-** Personalized study path generation- AI doubt resolution assistant- Adaptive testing engine- Predictive performance modeling

7. Data Strategy & Governance

Strict tenant data isolation.- Student PII auto-purged 3 months after subscription ends.- Retention of anonymized performance data for analytics model training.- Secure storage and compliance-focused architecture.

8. Revenue Model

Subscription-based pricing for coaching institutes.- Tiered plans based on number of students and analytics access.- Future AI-based premium tier.- Potential future B2C and government licensing model.

9. Competitive Positioning

Competitors:- Testbook- Adda247Differentiation:- AI-powered performance diagnostics- Coaching digitization infrastructure- Concept-level mastery analysis- B2B-first structured approach

10. Go-To-Market Strategy

Phase 1:- Target Tier 2 English-medium coaching institutes.- Offer pilot onboarding.- Demonstrate analytics differentiation.Sales Approach:- Direct demo model- ROI-driven pitch (reduce manual tracking & improve results)

11. Risk Assessment

AI over-promise risk → Controlled rollout strategy.- Engineering bandwidth constraint → Phased feature prioritization.- Coaching resistance → Focus on analytics & performance ROI.

12. 3–4 Year Expansion Vision

Year 1:- Stable SaaS infra + analytics engine.Year 2:- AI differentiation.Year 3:- National expansion + B2C.Year 5:- AI-first academic intelligence ecosystem with adaptive learning and marketplace potential.
